REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Prior arts of record do not disclose a method for monitoring a contaminated, dirty or flammable condition within an electrical consumer appliance. The method comprises: using an indicator, connected to an optical measurement device, to specify a measurement value that is a function of the measured attenuation of a light beam so as to indicate a thickness of the dust on the surface of the electrical consumer appliance and thereby indicate when an amount of dust on said surface exceeds an acceptable limit which structurally arranged and functionally operated as claimed in claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
